

Yale Vision.

Wireless fleet management.

Increase efficiency and reduce costs with complete fleet and operator visibility

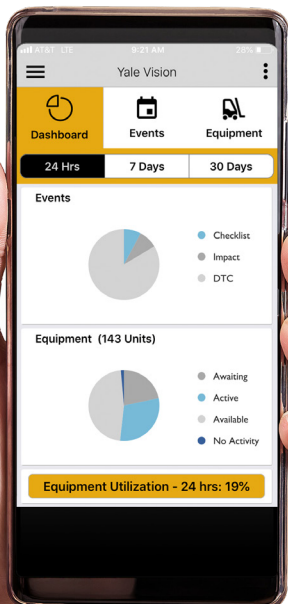

Leverage data-driven productivity and take your operation to the next level with Yale Vision wireless fleet management.

Interactive dashboards and reporting provide you with the insight you need to drive fleet efficiency, improve operator performance, reduce your carbon footprint and lower your overall materials handling cost.

Instant alerts notify you of critical events as they occur, helping you respond quickly to issues that could impact productivity.

Access the secure cloud-based portal from any internet-enabled device or use the mobile app to stay connected to your fleet on the move.

Improve site safety and operator compliance

Protect your people and assets by preventing unauthorised use of trucks and adhering to pre-shift checklist compliance.

Yale Vision encourages operators to adhere to best practices and provides you with individual operator data to help you better understand operational issues.

Operator access control

The telemetry unit provides a record of user access for operators prior to truck start-up.

Pre-shift checklists

Eliminate paper checklists and improve compliance with digital pre-shift checklists. Operators are all responsible to run through all required checks prior to truck start-up and operation.

Impact detection and shutdown

Advanced collision detection and real-time alerts improve fleet safety awareness and reduce damage. Impact shutdowns protect equipment from prematurely returning to operation following a critical impact.

Optimise equipment performance

Address problems before they arise by monitoring equipment performance. Yale Vision helps you streamline maintenance scheduling, conserve energy and reduce unnecessary equipment wear.

Equipment diagnostics

Maximise uptime with engine, transmission, hydraulic and electronic system alerts on Yale equipment for quicker fault diagnosis.

Periodic maintenance tracking

Track and schedule maintenance to help service planning and minimise downtime.

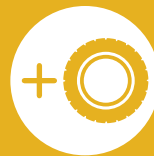

Inactivity shutdown

Conserve energy and lower costs by automatically shutting down any truck that hasn't been used within a specified amount of time.

Add-on: Yale Battery Fleet Management

Extend battery life and reduce maintenance costs with this standalone solution. Monitor lead-acid battery usage, cycles, errors, and state of health in the Yale Battery Fleet Management portal.

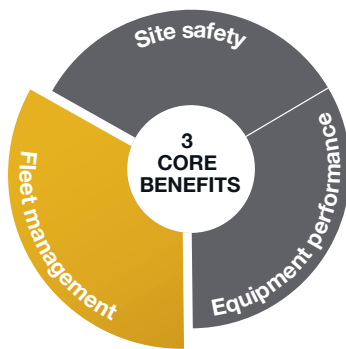

Add-on: Yale Tyre Pressure Management

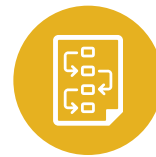

Keep your pneumatic tyres at optimal pressure. Receive temperature and pressure alerts.

Enhance fleet management and workforce productivity

Yale Vision provides data-driven insights to help you fine-tune your fleet size and composition so you can be sure you have the right equipment in place to keep your operation running as efficiently as possible.

Gain an understanding of operator behaviour and encourage improved operator performance. Yale Vision helps you reward high performers and identify operators requiring additional training.

Utilisation analysis

Optimise workflows and boost productivity by understanding the strengths of your operators and equipment.

GPS location

Locate your outdoor equipment and see where impacts are occurring with GPS.

Add-ons: GPS Motion

Use outdoor location tracking to optimise routes and highlight bottlenecks. Set virtual boundaries with geofencing.

Step 1

Yale Vision hardware records equipment data and automatically uploads it to cloud servers. Yale Vision can be factory-fitted to new Yale equipment and retrofitted to existing equipment, including equipment from other manufacturers.

Step 2

Yale Vision delivers data via the cloud to your internet enabled device, wherever you are in the world.

Step 3

Yale Vision portal and mobile app provides secure access to user-friendly dashboards and reports on key metrics.

Package options

Select from three levels for a telematics offering tailored to your operation.

			Wireless Verification	Wireless Access	Wireless Monitoring	Other equipment*

*Available functionality on other equipment is a guideline and can vary by manufacturer. Please contact your local dealer for further information.

About Yale[®]

Yale is a leading global manufacturer and supplier of high-quality counterbalance forklift trucks, warehouse equipment and fleet solutions. 'People, products and productivity' sums up our approach to the materials handling business. With over 140 years' experience, we are proud of our reputation as an innovative, forward-thinking manufacturer.

Yale dealerships provide flexible truck servicing solutions and are linked to one of the industry's most sophisticated parts distribution operations. You'll find support for Yale forklifts throughout the EMEA region – provided by a big regional footprint stretching through Europe, Middle East and Africa.

Materials handling for:

Automotive

Beverage

Chemical

Construction

Food

Logistics

Metals

Paper

Retail

Wood
