

# Yale Battery Vision

Take charge of your batteries

Increase your productivity and cut your downtime with Yale Battery Vision.

Yale Battery Vision is a fleet management solution that provides valuable insights to better care for your batteries and maximizes their performance and life. Utilizing existing wireless networks, Yale Battery Vision monitors usage, alerts users of potential battery issues, and transforms your facility's vehicles into an intelligent fleet operation. With Yale Battery Vision, you can now take charge of your batteries.

## WATER LEVEL

Encourages proper watering of your batteries by reporting electrolytes at high and low levels.

## 24/7 MONITORING

Utilizing existing wireless networks to transmit data to the cloud-based Yale Vision portal.

## SMART CHARGING

Delivers analytical data such as state of charge, voltage current, and battery temperature to improve battery care and charging behavior.

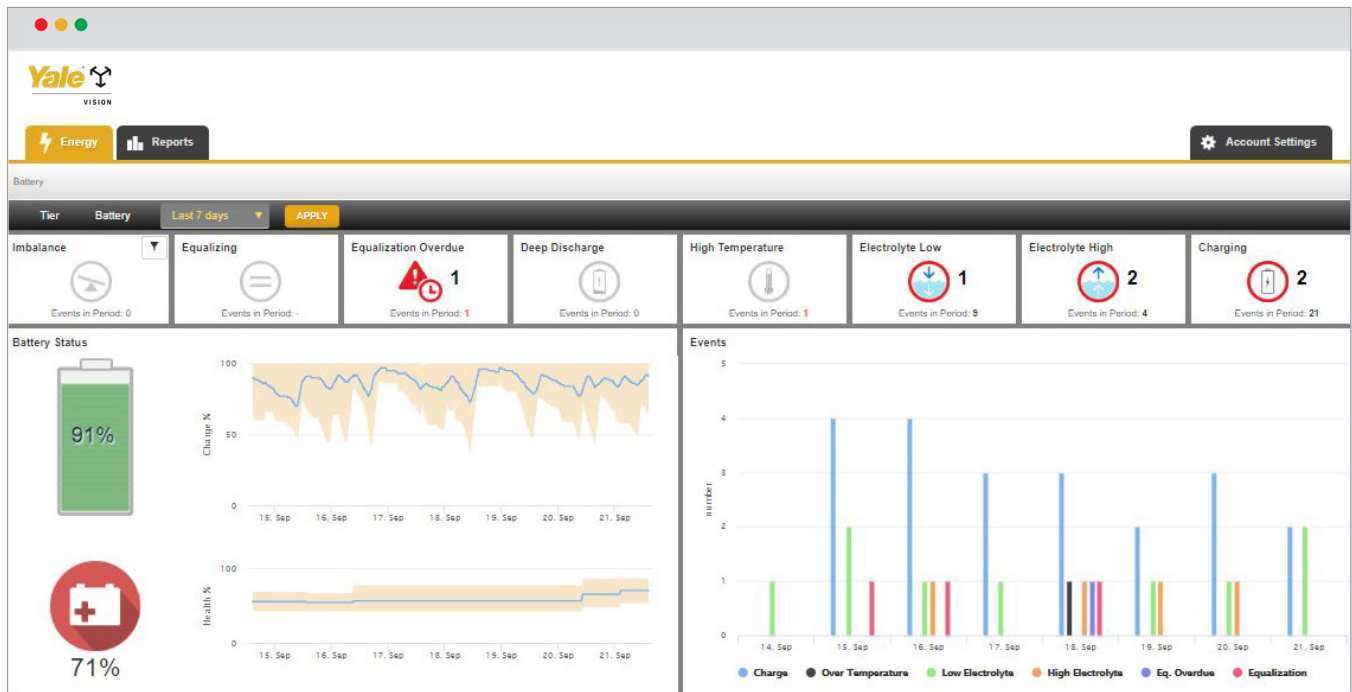

## WARRANTY COMPLIANCE

Stores data for the life of the battery and provides complete history to comply with your battery warranty.

BATTERY VISION

# DATA ANALYSIS PORTAL

Yale Battery Vision provides online portal access of your fleet's battery assets. You'll gain insights on the general health of your fleet in terms of charge level, event notifications, and calculated asset health metrics while highlighting potential undesirable treatments of battery assets in relation to charge and discharge characteristics.

- Extensive reporting capabilities
- Ability to download fleet information
- Intuitive user interface
- Delivers weekly exception reports and lifetime battery historical reports
- Real time alerts for early issue detection
- Prevents long term battery damage

## KEY EMAIL ALERTS:

- High temperature
- Electrolyte high
- Equalization overdue
- Electrolyte low
- Deep discharge
- Imbalance
